Boston, MA

WORK EXPERIENCE

Lead Software Engineer
Boston, MA

Legal Innovation & Technology Lab: **Suffolk University**
2025 - Present, 2020 - 2023

- Collaborated with legal SMEs to create guided online court forms used by 2.5k users monthly using Python, HTML and JavaScript, Redis, Flask, Docker, AWS, and S3.
- Lead hiring and created on-boarding process for new DevOps position.
- Built out infrastructure for, migrated, and managed 9 hosted servers for partner organizations.
- Spearheaded the development and deployment of an e-filing platform and API for 5 states using Java, Docker Compose, PostgreSQL, and AWS with high stakeholder input.
- Established standardized CI/CD workflows across the organization using GitHub Actions.
- Conducted WCAG 2.2 audits and improved accessibility of complex modes of data entry.
- Developed an integration testing framework with web accessibility capabilities using Node.js and Puppeteer.
- Co-authored an academic paper analyzing 15k state court forms to grade readability (Published at ICAIL 23).

IT Specialist / Lead Software Engineer (GS-14)
Boston, MA

IRS
Jan. 2024 - May 2025

- Lead team of 8 developers on multiple projects.
- Stood up new team from scratch, defining technical coding and Site Reliability practices, and Agile business processes.
- Led implementation of new OAuth2 solution, and migrated calls to 42 endpoints across 12 projects.
- Transitioned and revitalized 5 microservices, each with > 1.4 million daily queries and 99.99% uptime.
- Led new development of 4 microservices in initial pilot of an externally available general API for IRS. information, centered around taxpayer authorization of disclosure.
- Implemented InnerSource practices among several teams in Application Development office.
- Instituted and expanded Java Style and Coding Guidelines.
- Started a post-mortem culture of detailed write ups for production incidents.

Full-stack Contract Developer
Boston, MA

Freelance
Oct. 2023 - Jan. 2024

- Collaborated and built trust with Michigan Legal Help, Lemma Legal, and Suffolk LIT Lab as clients.
- Led migrations of 3 guided forms to the docassemble platform, using Python, HTML, CSS, and JavaScript.
- Built custom bootstrap theme compiler and viewer for quick branding iteration.

Motion Planning Software Engineer
Boston, MA

Realtime Robotics
2018-2020

- Crafted and optimized robotics motion planning algorithms in C++ in ROS, a pub/sub middleware, delivering optimal solutions in 0.5-3 seconds.
- Developed a novel autonomous vehicle motion planner (Patent No.: US 11,634,126 B2), with hardware engineers.
- Achieved a 70% reduction in robot cycle times through simulation software integration.

Software Engineering Intern
Zurich, Switzerland

Google, Tools & Infrastructure
2016

- Extended an Angular template parser to include Angular 2 syntax compatibility.
- Designed a dynamic web UI for real-time testing coverage data visualizations over Angular 2 Dart projects.

EDUCATION

Rice University

- **MS, Computer Science** 2018
- **BS, Computer Science & BA, Visual and Dramatic Arts from Rice University**, Magna Cum Laude 2017
